

Hôtel du Golf

First and foremost working with other people on a hotel project is all about coming together and exchanging ideas. Our role was to get involved in the project, to think about the broad outlines and to come up with consistent solutions designed to produce contemporary spaces offering daring design and contemporary comfort.

La belle Histoire

Suite

Designer : LBH concept

Surface area: 145 m²

Ambiance: The way the rooms were done came out of working on the harmony of the colours and the fabrics chosen by the owner which guided our choices towards various themes.

The most fascinating project was the innovative creation of a large-format suite measuring around 145 m², which we needed to be able to convert into two suites and one room. The work will be carried out in 2009.
